

Nancy S. Grasmick  
State Superintendent of Schools

200 West Baltimore Street • Baltimore, MD 21201 • 410-767-0100 • 410-333-6442 TTY/TDD

**TO:** Members of the State Board of Education  
**FROM:** Nancy S. Grasmick *Nancy*  
**DATE:** January 27-28, 2009  
**SUBJECT:** Results of the External Review of the Health Education Voluntary State Curriculum

---

**PURPOSE:**

The purpose of this item is to report the results of an external review of the Maryland Voluntary State Curriculum for Health Education conducted by Toucan Ed and to present this curriculum for State Board acceptance.

**BACKGROUND/HISTORICAL PERSPECTIVE:**

Impetus to develop the Voluntary State Curriculum (VSC) resulted from the call for rigorous content standards articulated in NCLB legislation and the 2002 Maryland report, *Achievement Matters Most: The Final Report of the Visionary Panel for Better Schools*. An important recommendation of the Visionary Panel report was for state and local school systems “to align every aspect of education...to support the classroom teacher.” This initiative also recommended development of a statewide grade K – 12 curriculum that specifies by grade and subject area what students are expected to know and be able to do. The health education VSC defines what students should know and be able to do at each grade level, Pre-K through 8, and for the one-half credit course required for high school graduation.

**EXECUTIVE SUMMARY:**

MSDE began drafting the health education VSC in 2004-2005. Representatives from Maryland’s local school systems and institutions of higher education joined with MSDE staff to develop initial drafts. The documents underwent a series of subsequent reviews where scope, sequence, assessable content, and consistency were examined and revised by MSDE and health education specialists.

The health education VSC design efforts engaged processes similar to those used earlier by other core content VSC development teams. Similarities are particularly evident in the delineation of PreK – 8 grade-by-grade discrete instructional targets as well as in format. At the top level, *content standards* are broad statements of what students should know and be able to do. Within each content standard are *indicator statements* that vary in number within and across content

standards and grades. Indicator statements break the content standards into “teachable components. Finally, *objective statements*, written with the most specificity, describe what students are expected to know and be able to at a given grade level. They are intended to guide teachers in the delivery of instructional activities and, therefore, should be measurable.

Representatives from local school systems and higher education participated in various steps of development, review, and revision in the curriculum development process. During spring 2007, Division of Instruction staff conducted district visits to collect feedback and input from teachers, administrators and parent groups about the health education VSC. Visitors to mdk12 website have also had the opportunity to provide feedback for the document. In addition to collecting feedback, the district visits and focus groups provided opportunities to observe curriculum implementation and to collaboratively determine professional development needs, and discuss possible MSDE and local school system partnerships to address identified needs.

In 2008, Toucan Ed was awarded the contract to review the health education VSC. To carry out this review, Toucan Ed drew on the expertise of five nationally recognized content experts. The review team developed a series of rubrics to use in evaluating the health education VSC and then summarized that information and provided specific discussion to Maryland’s health education leadership. As soon as the preliminary report was available, health education coordinators, supervisors, and resource teachers from across the state began carefully reviewing and responding to the recommendations made in Toucan Ed’s report.

**ACTION:**

This item is presented for Board acceptance.
